He was a big fan of Pokemon and has been playing the game since childhood.As he was browsing the internet about Pokemon related stuff, he found a rom hack of Pokemon Ultra Sun and Moon, which was surprisingly rated 18+. He clicked the link to download it and as he was opening the game, his hand touched his coffee mug, which spilt the coffee on the power socket. There was a short circuit and it electrocuted him, killing him in the process. When he woke up, he found himself in the world of Pokemon with a system, but he had a problem. No matter how much he trained his Pokemon, they wouldn't level up. Until one day, when he was kissing a girl when a notification popped up saying "All the Pokemon in your party received 2000 exp."Note - I found the cover photo on Google and I don't own it. The owner can ask me to remove it if they don't like it. Does this one not like VBA? I created and tested it with NUPS and it works fine here. what are the difference between both versions? just the legendary? also are both for fire red? yes. they are Unusual. Did you use Squirrels FireRed, or does it need to be a different version? Originally Posted by Sparhawk55 [Original Post] Unusual. No. Use firered 1.1 this sounds cool, if i can get it to work i'll try it out and see about critiquing it. EDIT: ok i'm already noticing clipping issues and a lot of text box issues. Its played fine so far, but really needs a bit of polish i think. Found some bugs: Game randomly reset in mt moon Exiting the southeast house in vermilion (with the pidguy) took me out into pewter. The encounter system for wild Pokemon is cool, I like that you can interact with the overworked sprites to start battles alongside the normal encounters. I reset 4 times and got a shiny charmander © Originally Posted by Ishrak Rahman [Original Post] No. Use firered 1.1 I would put this up on the main page as the majority of hacks out there use Squirrels. Keep up the good work! Looking forward to giving this hack a whirl. What's the basic difference between the two? Is there a way to change abilities at some point? Kinda reminds me of the Dark Rising series, 1158's series and Pokemon Order and Chaos.
